Summary

Results-driven Research Analyst specialising in bridging corporate sustainability data with fundamental financial analysis. Expert in global reporting frameworks (GRI, SASB, TCFD), GHG emissions tracking (Scope 1, 2, 3), and valuation modelling to support sustainable investment decisions. Proven ability to architect AI-assisted automation tools that optimize data validation, streamline compliance workflows, and drive major operational cost savings for global institutional portfolios.

Skills

ESG & Climate Risk: GHG Protocol (Scope 1, 2, 3), Corporate Governance, Materiality Assessments, Physical & Transition Risk, GRI, SASB, TCFD.
Financial Analysis: 3-Statement Modelling, DCF Analysis, Relative Valuation, Equity Research, Thematic Research.
Platforms & Tools: Advanced MS Excel, Capital IQ, S&P Spark Assist (AI), Prompt Engineering.
Core Strengths: Data Validation, Financial Modelling, Process Automation, AI Agent Development, Reporting.

Experience

ESG Research Analyst **July 2024 – Present**
S&P Global *Gurugram, India*

- Successfully transitioned from a Quess Corp contract to a full-time internal S&P Global employee due to 100% adherence to ESG data validation standards and process automation.
- Analysed ESG datasets and financial metrics for 700+ global equities (US, UK, APAC) using Capital IQ and Advanced Excel, mapping disclosures to GRI, SASB, and TCFD frameworks to ensure robust sustainability reporting.
- Developed "SegMap Engine," a prompt-based AI agent using Spark Assist (internal AI tool) for automated NAICS industry classifications, improving data accuracy and saving the operational equivalent of 5 Full-Time Employees (FTEs).
- Executed complex business segment analysis and mapping to facilitate the automated backend calculation of Scope 1, 2, and 3 carbon emissions, supporting corporate GHG inventories and environmental impact assessments.
- Validated sector-specific ESG metrics and corporate disclosures, achieving 95% accuracy in data processing to ensure highly reliable sustainability feeds for institutional clients.
- Deployed "DPM Buddy," a custom AI Q&A assistant, and mentored incoming analysts on complex ESG data mapping, reducing overall team query resolution time by 40%.

Projects & Research

Equity Research Report & Valuation – Mahindra & Mahindra **2023**
Independent Academic Project *Remote, India*

- Formulated a 14-page comprehensive equity research report, analysing macroeconomic trends, EV market climate transition opportunities, and fundamental financial health.
- Conducted Corporate Governance (ESG) analysis, evaluating board independence, gender diversity, and executive remuneration compared to 2 key industry peers (Tata Motors, Maruti Suzuki).
- Executed 3 relative valuation multiples (EV/Revenue, EV/EBITDA, P/E) and DCF analysis in MS Excel to derive implied market value, simulating buy-side investment research workflows.

Education

Master of Business Administration (MBA) - Finance **2023**
Maharshi Dayanand University *Gurugram, India*

Bachelor of Commerce (B.Com) **2020**
Maharshi Dayanand University *Rohtak, India*
